Instructions:

- 1) All questions are compulsory
- 2) Answers of Questions and Sub questions must be written strictly according to the serial order of question paper, otherwise the question shall not be valued
- 3) Do not write anything on the blank portion of the question paper. If written anything, such type of act will be considered as an attempt to resort to unfair means.

Q. 1 Read the passage carefully and answer the questions.

Health in the broad sense of the word doesn't merely mean the absence of disease. It also includes as embodied in the WHO definition, a state of physical, mental & social "well-being". The harmonious balance of the state of the human individual integrated into his environment constitutes health. The state of positive health implies the notion of perfect functioning of the body & mind. It conceptualizes health biologically, as a state in which every cell & every organ is functioning optimum capacity & in perfect harmony with the rest of the body, psychologically as a state in which the individual feels the sense of the perfect well being & of mastery over his environment & socially as a state in which the individual capacities for participation in the social system are optimal. These ideas were widely ventilated some years ago but now appear slightly ridiculous.

- a. What is positive health ?
- b. What is the definition of health according to WHO ?
- c. Give the antonym of POSITIVE
- d. Give a suitable title to the passage
- e. Give the meaning of Optimum
